EDUCATION

- | | |
|---|--------------------------------|
| • R V Institute Of Technology And Management, Bengaluru
<i>B.E in CSE, 7th Semester</i> | <i>2023-2027</i>
CGPA: 8.45 |
| • Narayana PU College Hulimavu, Bengaluru
<i>Board of Intermediate Education, Karnataka</i> | <i>2023</i>
Percentage: 89 |
| • Narayana E Techno School Hulimavu, Bengaluru
<i>CBSE, Karnataka</i> | <i>2021</i>
Percentage: 91 |

EXPERIENCE

- | | |
|--|----------------------------------|
| • Ultimez Technologies
<i>Backend Developer</i> | <i>March 2025</i>
Bengaluru |
| <ul style="list-style-type: none">– Contributed to backend development by creating secure, scalable APIs for client projects.– Collaborated with cross-functional teams to design and implement secure, scalable backend APIs. | |
| • Capabl
<i>Project Intern</i> | <i>October 2025</i>
Bengaluru |
| <ul style="list-style-type: none">– Collaborating directly with industry experts to design and develop AI-driven solutions.– Contributing to the development of intelligent AI Agents leveraging RAG architectures, Large Language Models (LLMs), LangChain, and various Machine Learning techniques. Focused on optimizing context retrieval, model performance, and system scalability for practical deployment | |

PERSONAL PROJECTS

- | | |
|--|------------------|
| • CBPA Studio: Customer Segmentation & Analytics Platform 🔄
<i>ML-powered analytics platform for customer segmentation using RFM analysis and K-Means clustering</i> | <i>May 2026</i> |
| <ul style="list-style-type: none">– Tools & technologies used: ReactJS, Material UI, FastAPI, Python, Scikit-learn, Pandas, NumPy, Recharts– Built an end-to-end analytics dashboard that performs RFM (Recency, Frequency, Monetary) analysis and customer segmentation using K-Means clustering.– Developed interactive modules for dataset validation, cluster diagnostics, customer segment visualization, and business insight generation through modern data-driven dashboards. | |
| • Tibl-AI 🔄
<i>AI-Powered Timetable Management System that dynamically generates schedules using Genetic Algorithms</i> | <i>Sept 2025</i> |
| <ul style="list-style-type: none">– Tools & technologies used: ReactJS, Node.js, Express.js, MongoDB, TensorFlow, FastAPI, Python– Developed an AI-powered timetable management platform using the MERN stack capable of generating and adapting academic schedules based on dynamic constraints and large datasets.– Implemented Genetic Algorithm-based optimization techniques for intelligent timetable generation while ensuring scalability, database integration, and a responsive user experience. | |

TECHNICAL SKILLS AND INTERESTS

Languages: Python, C, C++, Java, JS, CSS, HTML, JQuery

Developer Tools: VS Code, Git, GitHub, Jupyter Notebook, Postman, IDLE

Frameworks: React, Node.js, Express, Flask

Cloud/Databases: MySQL, MongoDB, Supabase

Soft Skills: Problem-solving, Team collaboration, Adaptability, Communication

Coursework: Data Structures Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning

Areas of Interest: Web Development, Artificial Intelligence, Cloud Computing, Software Engineering

POSITIONS OF RESPONSIBILITY

- | | |
|--|-----------------|
| • Club Member, The Starfleet Club RVITM | <i>1yr 8mos</i> |
|--|-----------------|
